T. rex and the Crater of Doom is a nonfiction book by professor Walter Alvarez that was published by Princeton University Press in 1997. The book discusses the research and evidence that led to the creation of the Alvarez hypothesis, which explains how an impact event was the main cause that led to the Cretaceous-Paleogene extinction event .

T. Rex and the Crater of Doom - Wikipedia

T. Rex and the Crater of Doom. Sixty-five million years ago a gigantic comet or asteroid as big as Mount Everest slammed into the Yucatan Peninsula, creating an explosion on impact equivalent to the detonation of a hundred million hydrogen bombs.

T. Rex and the Crater of Doom by Walter Álvarez

In T. Rex and the Crater of Doom, some brilliant, not to mention determined, scientists roam the world and seek out the clues. What they conclude is that the earth withstood a colossal impact with a meteor (or perhaps a comet) 65 million years ago.
